

CLINICAL EFFECTIVENESS PROGRAM

Peer Consulting understands the many cultural, clinical and technical nuances that result in an effective CPOE implementation. We have extensive experience in coaching physicians and other influential clinician leaders to champion change.

We partner with you to ensure that your organization fully deploys CPOE, reaching new levels of patient safety, shared knowledge and quality of care.

LEAD CLINICAL TRANSFORMATION. SUCCEED AT CPOE.

PEER CONSULTING

WITH CPOE, healthcare organizations have the power to significantly improve patient safety. Peer Consulting is skilled in guiding organizations through the transformative change required for full CPOE implementation and success.

PHYSICIAN INVOLVEMENT. INTERDISCIPLINARY COLLABORATION. EVERY STEP OF THE WAY.

Peer Consulting's focus is on enabling you to build collaboration among clinical disciplines in order to achieve 100 percent physician participation in CPOE.

BUILD A LASTING FOUNDATION FOR EVIDENCE-BASED CARE

We work with your clinical team to assure that your use of CPOE intelligently supports patient safety and evidence-based medicine — not only at go-live, but sustainably.

PREPARATION DRIVES ACTION AND SUCCESS

We help your organization create collaborative, high functioning teams, establish a knowledge management service, and develop essential IT capabilities required for your initiative.

OUR CLINICAL EFFECTIVENESS METHODOLOGY

Through our experience with physician and technology leaders, we've developed a comprehensive methodology based on four key initiatives managed in concert.

- Charter, launch and coach transformative teams including an executive steering group and physicians, nurses and allied health professionals who can actively engage colleagues
- Create a knowledge management strategy and team, ensuring that your organization systematically deploys and updates evidence-based guidelines within your clinical care
- Redesign workflow, enabling a smooth transition from current to information-supported future workflow, including contingency planning
- Strategically guide your IT implementation project, focusing on clinician involvement and design-build of order sets
