OUR RADIOLOGY INFORMATION SYSTEMS (RIS) PRACTICE

Specializing in GE Centricity® RIS-IC

PEER CONSULTING

YOUR RADIOLOGY INFORMATION SYSTEM (RIS) is essential to patient satisfaction and to the productivity of your radiology team. A RIS that is well-designed and intelligently configured can make a world of difference for your patients, while benefiting your entire enterprise.

At Peer Consulting, we excel in helping clients manage every aspect of a RIS implementation – resulting in more efficient and effective workflow for your physicians, technologists, schedulers and administrative staff.

Whether you're installing a new RIS, upgrading your current system, or integrating a RIS within an enterprise system, we are an experienced and capable ally to have at your side.

Peer Consulting offers in-depth knowledge of RIS technology and radiology workflow, combined with a proven ability to collaborate with your team members and to train end-users, helping to move your organization toward a paperless environment.

Our consultants have years of experience with Centricity RIS-IC (formerly known as Imagecast) as well as other leading RIS systems. We specialize in helping you achieve your system's full benefits.

Our capabilities include:

- Systems selection knowledge
- Management of Centricity RIS-IC mammography implementations
- Workflow analysis and redesign, both pre- and post-activation, including upgrades
- Dictionary and overall system set-up, build, analysis and testing

- Integration and interfacing with PACS, enterprise systems and other interfaced solutions (dictation/voice recognition; third-party scheduling; technical and professional billing and others)
- Interface analysis and testing using IDX ConnectR
- Needs analysis and design of scheduling templates and forms to ensure streamlined workflow
- Analytical skills to support RIS and Mammography data conversions, enabling preservation of prior patient, exam and result history
- Comprehensive training capabilities for all Centricity RIS-IC applications
- Printing set-up and daily application maintenance
- Document modeling for structured reporting
- Context searching for critical findings within diagnostic reports
